Error handling

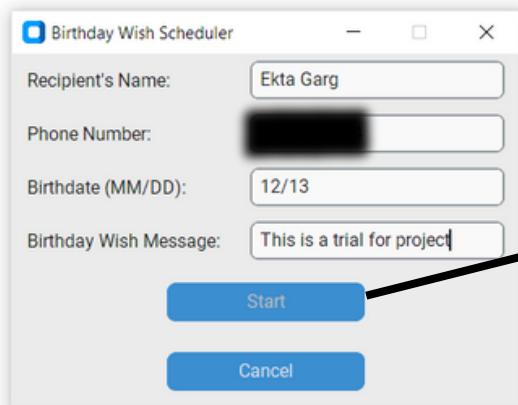

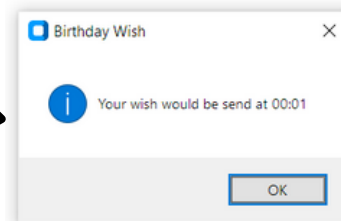

Birthday wish scheduler

A screenshot of the 'Birthday Wish Scheduler' application window. It features four input fields: 'Recipient's Name:', 'Phone Number:', 'Birthdate (MM/DD):', and 'Birthday Wish Message:'. Below these fields are two buttons: 'Start' and 'Cancel'.

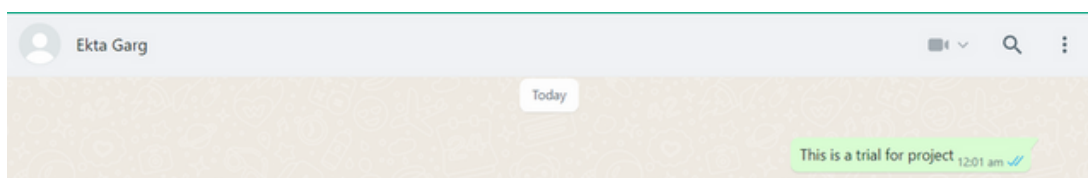

A screenshot of the 'Birthday Wish Scheduler' application window with the following data entered: 'Ekta Garg' for the name, a redacted phone number, '12/13' for the birthdate, and 'This is a trial for project' for the message. The 'Start' button is highlighted with a black arrow pointing towards the next window.

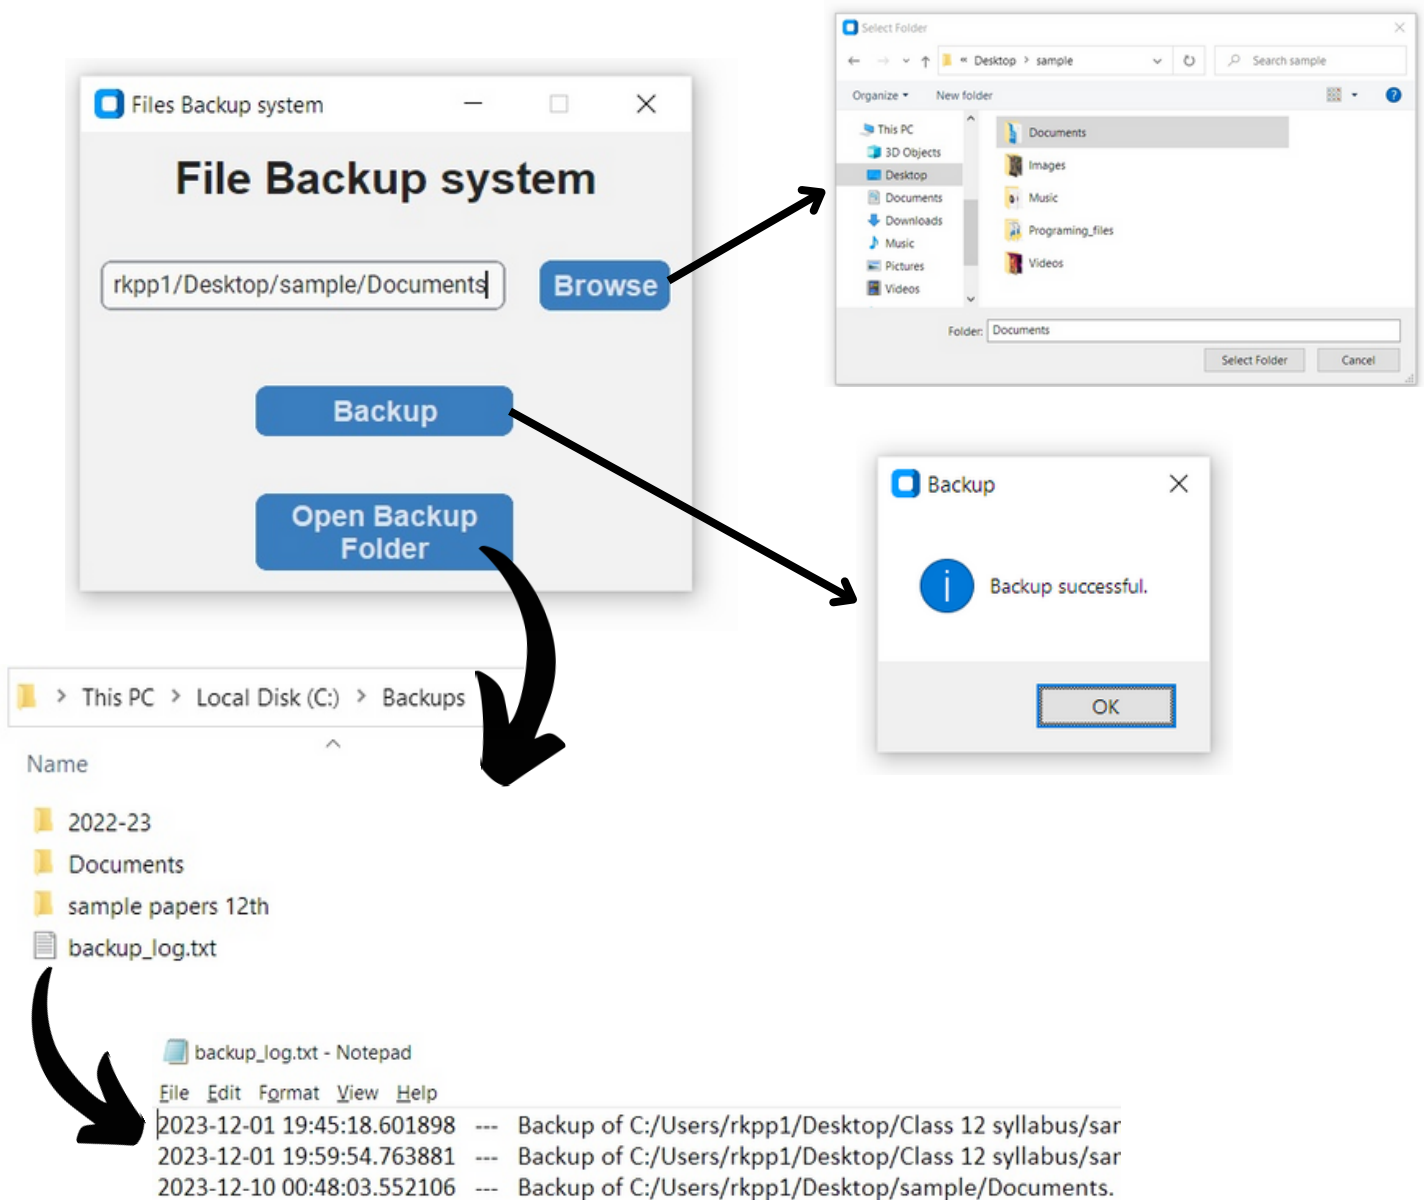

A screenshot of the 'Birthday Wish Scheduler' application window, identical to the one with filled data, but the 'Start' button is now disabled (greyed out) and the 'Cancel' button is enabled. A black arrow points from the 'Start' button to the explanatory text.

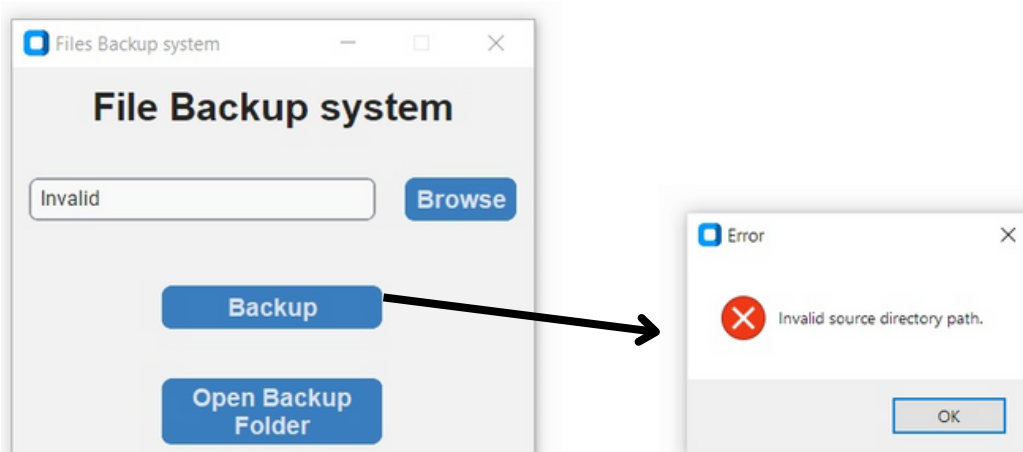

The Start button is disabled and Cancel is enabled
On hitting Cancel the window is closed and wish will not send
